WARRANTY

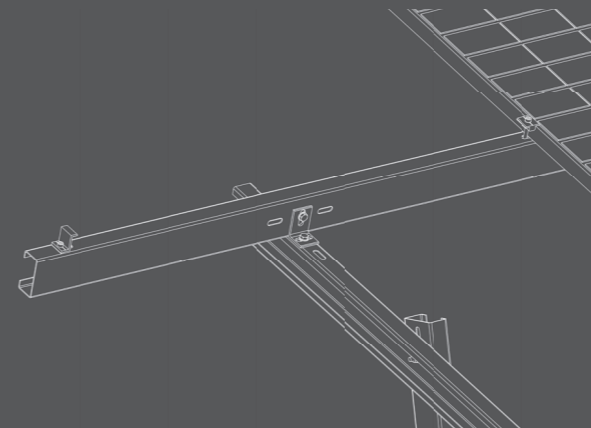

KEY FEATURES

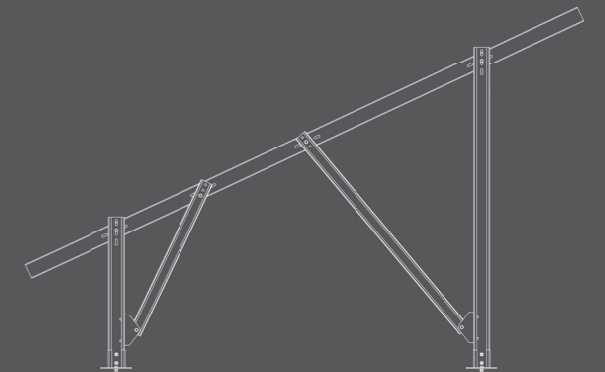

1. Manufactured from Zinc-Aluminum-Magnesium Coated Steel, our products offer superior corrosion resistance, surpassing that of galvanized steel.

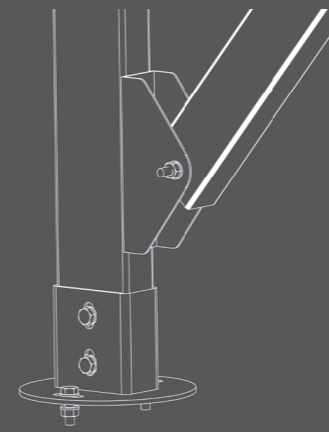

2. We offer a variety of rail profiles to accommodate the unique requirements of each project.

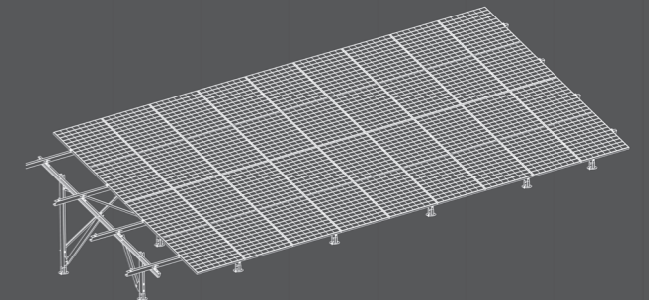

3. Rails are easily installed to the upright structural support using our rail clamp.

4. Strategically engineered for optimal strength and cost-effectiveness, The W shape structure utilizes triangular mechanics to maximize structural integrity without compromising value.

5. The base is securely fixed to the ground using anchor screws, while the column is locked in place with carbon steel bolts, ensuring stability and preventing any loosening or displacement.

6. Customized designs and solutions tailored to meet various foundation requirements.
